

Professional Reference for INELSO

Dear Mr,

We've worked with INELSO on numerous projects for our clients in US and Europe mainly on the development of custom animated videos for eLearning and courses made with Storyline and Rise.

For these cases we normally provide them with the raw material along with a specification brief. The INELSO team then share with us the suggested storyboard/scripts etc. for our review and approval before they proceed with the actual development of the digital content.

During our engagement with INELSO, we've always established flawless communication. They've been consistently efficient and professional and always available to respond promptly to our requests at any stage of the projects.

I remain available for any additional inquiry on this matter.

Kind Regards,

Elias Parlavantzas
